

SK Lubricants Europe becomes 20th member of ATIEL

SK Lubricants Europe B.V., part of Korea's SK Lubricants, joined ATIEL on February 1 2010.

SK Lubricants is the world's leading manufacturer of high quality Group III base stocks known as YUBASE and YUBASE plus. Since initial production in 1995, YUBASE base stocks are currently produced from 3 manufacturing plants, with additional plants to be announced.

YUBASE products are a fundamental component of high performance engine and driveline lubricants that contribute to higher fuel economy, reduced emissions and reduced maintenance costs in passenger cars and commercial vehicles. The technology is supported by an efficient logistics network and strong technical expertise.

SK Lubricants will join the ATIEL General Assembly and be an active member of the Technical Committees and Industry Liaison Groups.
